

AUSTIN DATA CENTER

2950 N. LOOP W. 10TH FLOOR HOUSTON, TX 77092

Logix's Austin data center is a unique, world-class facility strategically positioned east of Austin's central business district. Located at 1905 E. 6th Street, the facility features a multiple-carrier Internet backbone, fiber DWDM connection to the Logix core network, dual backup power supplies, state-of-the-art environmental controls and security systems.

Our Austin data center is designed for resilient, top-tier performance, supported by our fully redundant and highly available optic network. The flexibility of our fiber network and multi-datacenter infrastructure gives businesses the ability to customize private, public and hybrid cloud solutions and implement mission critical applications to meet any operating requirement.
