

DNS Records needed for LOGIX-HOSTED Microsoft Exchange

Who needs this User Guide?

Customers who have their Domain Name Service hosted by a 3rd party.

Why this User Guide?

This guide will provide the Host records needed to point your domain's E-mail traffic to LOGIX-HOSTED Microsoft Exchange. Please contact your DNS provider if you have configuration questions.

Records for all customers:

Type	Hostname	TTL	IP
A	mail.yourdomain.com	3600	139.138.158.102
A	smtp.yourdomain.com	3600	139.138.158.101

Type	Hostname	TTL	Port	Target
SRV	_autodiscover._tcp.yourdomain.com	3600	443	mail.logixcloud.com

*Recommended SRV record weight and priority is 0

MX Records for all customers:

Type	Hostname	TTL	Priority	Target
MX	yourdomain.com	3600	10	smtp.yourdomain.com
MX	yourdomain.com	3600	50	mail.yourdomain.com

SPF Record for all customers:

Type	TTL	Target
TXT	3600	yourdomain.com. v=spf1 ip4:139.138.158.102/32 ip4:139.138.158.101/32 ~all
