

Flexible, Reliable and Robust Network Connectivity

LOGIX's fiber network covers over 290,000 fiber miles and connects more than 3,000 enterprise buildings and 100 data centers. Single and multiple company locations can connect easily on the LOGIX network to obtain low-latency, highly available services for advanced voice, video and data applications.

As the preferred fiber network provider to businesses in Texas, LOGIX is trusted by over 10,000 of the most demanding companies for exceptional reliability and service.

LOGIX Business Ethernet

- Metro Ethernet Forum (MEF) 2.0 certified offer supports Ethernet Private Line (EPL), Ethernet Virtual Private Line (EVPL), point-to-point services and Ethernet Local Area Network (E-LAN) multipoint services.
- Full range of scalable speeds including 100 Mbps, 250 Mbps, 500 Mbps and Gigabit speeds up to 100 Gbps.
- Secure, private site-to-site data center and cloud service provider connectivity options.
- Ensured quality of service for high-priority latency- sensitive voice, video and data applications.
- Prioritized, assured delivery that provides consistent and reliable network performance.

The LOGIX Advantage
